[20th October 2013]

PREAMBLE

The '**Tribal Sovereign Nations of the World**', *(by right, as given by the Creator)* will exercise the privileges of sovereignty, along with the powers and subsequent authority sovereigns hold too; operate under divine lore, regulate their activities, operate their own custom and usages, carry out trade, equity and commerce, all under the auspices of self governance, so long and in so far as, said governance is not repugnant to the general principals of humanity. This will be accomplished through the use of the divine doctrine '***That you do no harm to your fellow man or his property***'.

With this in mind and working unified *(with all due respect to other Sovereigns, their similarities and or diversities)* beyond the scope of non living entities *(i.e.; corporations, defacto governments and or foreign rule)*, we can then facilitate; proper, just, transparent and accountable representation of and to the people through the use of ethical and moral practices, able to be facilitated through the use of consultation, permanence, absoluteness, comprehensiveness and indivisibility processes utilising; new, current and suppressed technologies. The use of renewable and unmetered technologies will be the new norm under Tribal Sovereign Nations governance.

The ability for us to co-create better outcomes and environments resides within us all. Tribal Sovereign Nation Members will administer to our inherent rights through Sovereign Nations Charters, ensuring the aspirations, prosperity and well-being of all, paving the way for us to eliminate famine, disease and suffering, thereby enabling us to finally embrace one another with the dignity and spirit of the Creator's grace and love.
